Parts for transmissions with Quarin and others

Brake pad supply and installation

As a spare part distributor and trader, we offer a wide range of spare parts like SAF, BPW, ROR, SMB

You win games with talent, but
championships are won with
teamwork

Who We Are:

- **Founded in 1973 , Al Sultan Company is one of the companies of MR. Mustafa Antar**

We strive to be the largest service and repair center in Egypt and the Arab world that can service all types of heavy trucks with the highest level of experience and efficiency.

The company started with turning, metal forming, welding, and all related heavy trucks maintenance and service works.

As a result of great experience and a desire for leadership, the company was developed in 2020 at all levels and more than 45 engineers and technicians were trained to the highest standards.

German technology was used to develop the equipment, lathes, friezes, angle and balance adjustment devices.

An expansion of 3000 square meters has been made to the place.

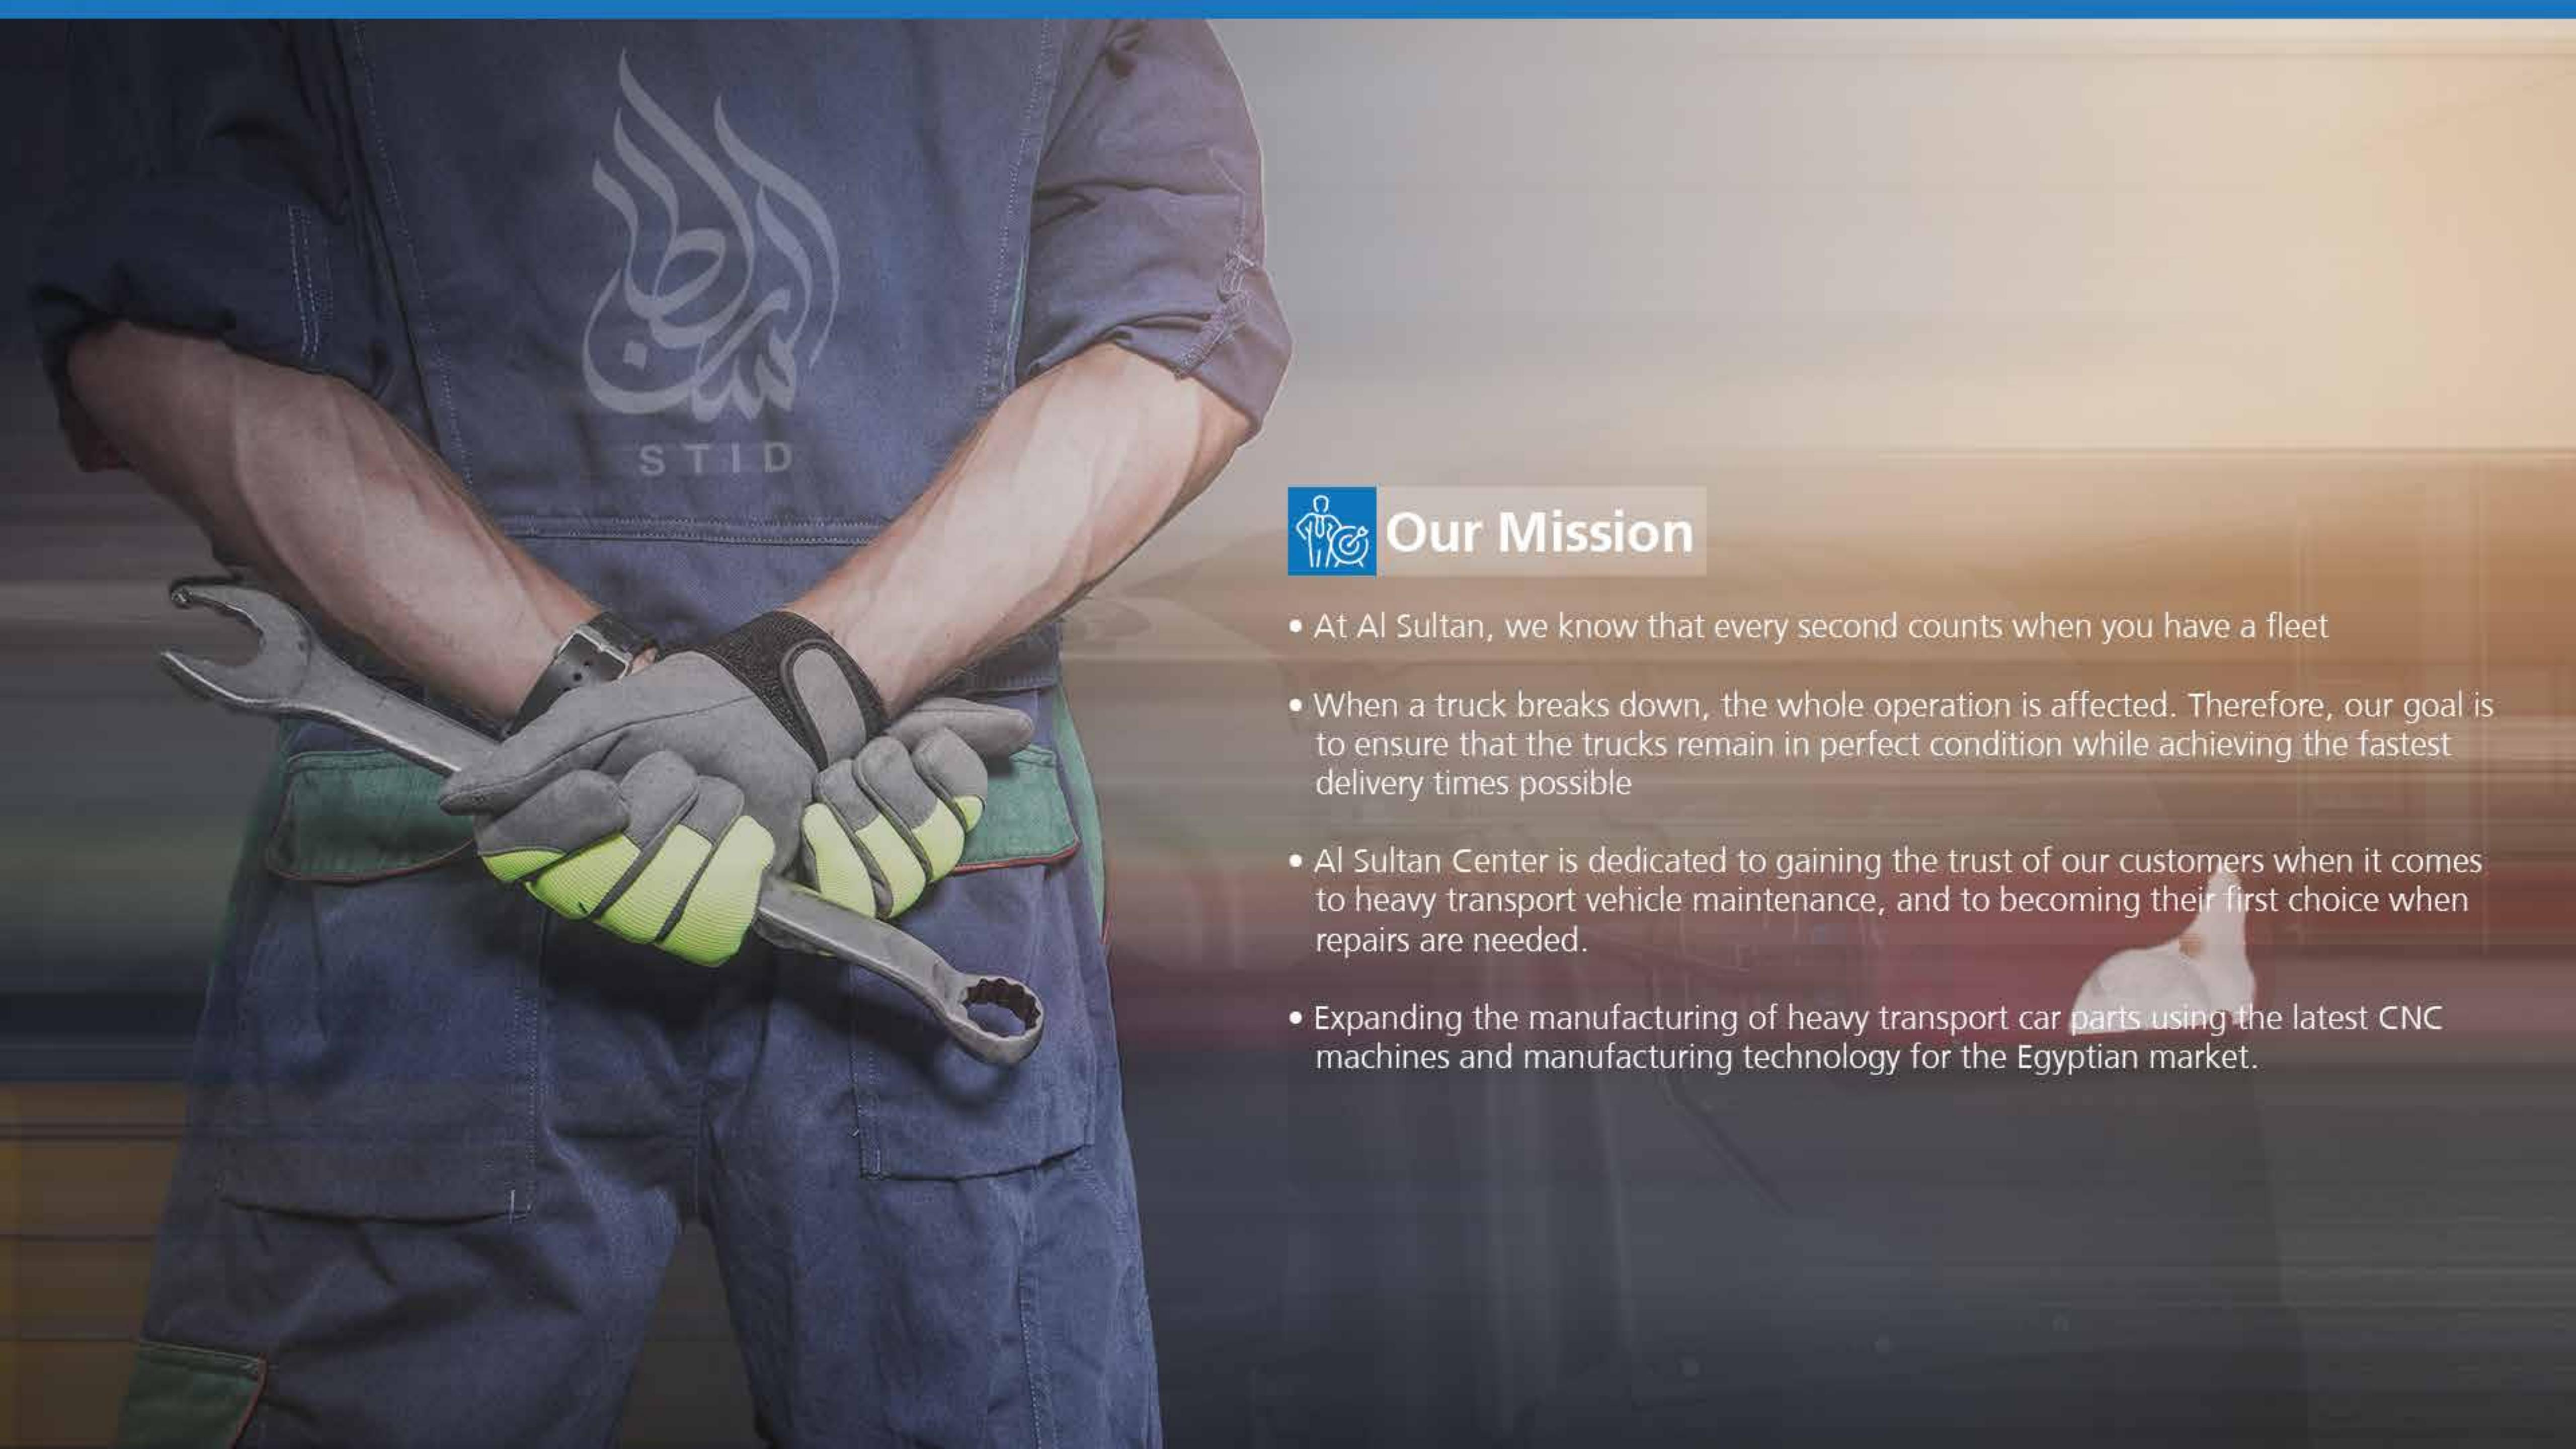

Heavy transport spare parts have been supplied and imported in excess of 2,000 items.

Among our innovations, we introduced a device for checking and adjusting the angles and stacking of heavy trucks tires in Egypt for the first time.

As part of the company's manufacturing department, the latest CNC machines have been included and commissioned in order to provide spare parts to the heavy transport sector.

Consequently, the company now has the largest integrated maintenance center for heavy transport vehicles, trailers and trucks refrigerators.

Our Mission

- At Al Sultan, we know that every second counts when you have a fleet
- When a truck breaks down, the whole operation is affected. Therefore, our goal is to ensure that the trucks remain in perfect condition while achieving the fastest delivery times possible
- Al Sultan Center is dedicated to gaining the trust of our customers when it comes to heavy transport vehicle maintenance, and to becoming their first choice when repairs are needed.
- Expanding the manufacturing of heavy transport car parts using the latest CNC machines and manufacturing technology for the Egyptian market.

It is our aim to export our manufactured products to all countries around the globe in order to reach the global market

Our vision

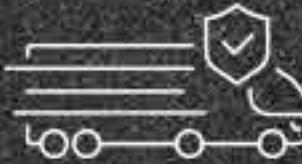

- With superior services, fast delivery times, and cost effective pricing, we aim to become the maintenance center trusted by truck and fleet owners
- Al Sultan Service center strives to be a leader in the maintenance and repairs of transport vehicles in the Arab world, following the highest local and international standards.

Our Values

Credibility

Customer satisfaction

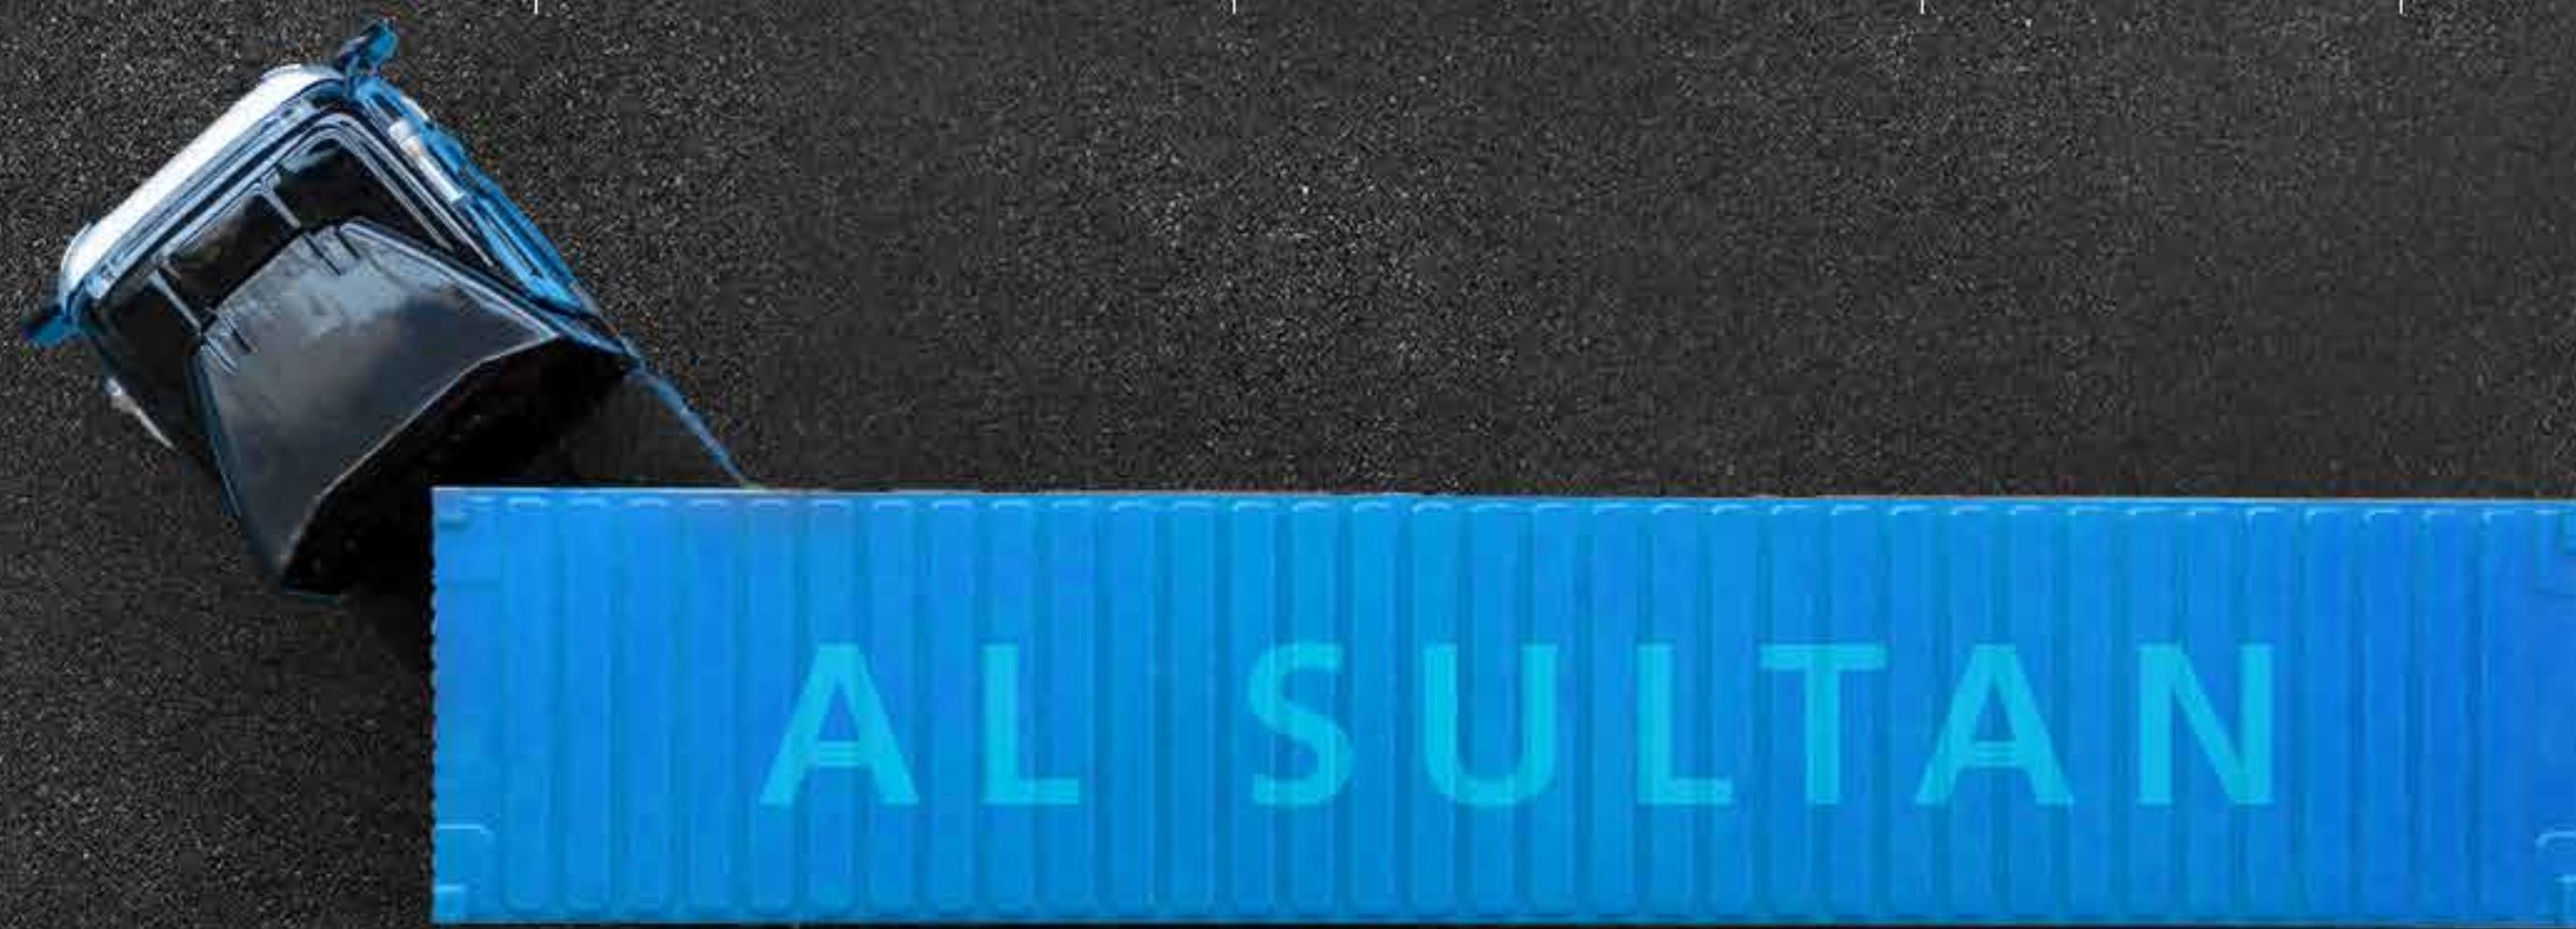

Teamwork

Safety

Quality

Success means doing our best with what we have.

"Success is the work, not the achievement."

In the attempt, not the victory. Success is a personal metaphor

"And to reach our highest self, to become all that we can be."

Zig Ziglar

After sales service

A guarantee is adopted after we obtain the Working Party's services

Why Alsultan?

-  **More than 50 years of experience**
Since 1973.
-  **Full Integrated maintenance center with comprehensive capabilities**
We can repair all heavy trucks and trailers, so it won't take time for you to get your truck back on the road.
-  **Providing the best quality and service at a fair price**
As a long term partner, we strive to provide unparalleled prices to our customers and also strive for quality and transparency in our services.
-  **Using the best original spare parts & an authorized distributor of the most important brands**
We provide original spare parts that meet quality specifications and standards.
-  **Work under the supervision of specialized engineers**
We strive to provide reliable service, so all our services are carried out under the supervision and control of specialized engineers.
-  **Highly trained technicians**
In order to achieve customer satisfaction, we provide intensive training for our technicians and use high quality tools.
-  **Located in the heart of the manufacturing sector, where art meets technology. We provide accurate and reliable services, from turning to milling.**
We are proud to provide an incomparable service in the world of manufacturing. Customer satisfaction is our main motivation.

Our development team is always guided by experienced engineers who supervise the use of the latest German and American devices and equipment
